WEB DEVELOPER

A recent Computer Engineering graduate with a strong web development foundation in HTML, JavaScript, and Node.js, is seeking an entry-level Software Engineer position. Passionate about continuous learning and staying updated with industry trends, they aim to contribute to innovative projects within a dynamic technology company.

KEY COMPETENCIES

Web Development	Database Management	Strong interpersonal skills
Problem-Solving	Critical thinking skills	Continuous Learning
API Integration	Version Control	organisational skills

PROFESSIONAL EXPERIENCE

Aakash Technolabs
Internship
During my 15-day internship with Aakash Technolabs, I worked strongly with Node.js and JavaScript on a number of web development projects. I obtained real experience by creating, building, and testing web apps. This experience enabled me to work successfully with team members, improve my troubleshooting and problem-solving abilities, and increase my knowledge of essential web technologies.

Arth Infosoft Pvt Ltd.
Internship
During my three-month internship at Arth Infosoft Pvt Ltd, I worked on an app and gained practical exposure to the MERN platform (MongoDB, Express, React, and Node.js). This internship provided me with extensive experience in API development and security measures. In addition, I learned the value of collaboration and teamwork while working closely with other engineers to build a functional and secure application.
